NO. 100000

30 October 1956

24 NOV 1956
MEMORANDUM FOR THE RECORD

SUBJECT: Supplement I, Section 5 (Comments on Principal Sources)

With respect to the "Comments on Principal Sources" contained in Supplement I, Section 5, OBI considers that they should be integrated within the other respective sections of Supplement I and not appear as an individual section for the following reasons:

a. Maintenance on Supplements I may proceed by individual sections with the result that whenever a section is maintained, then ipso facto the "Comments on Principal Sources" now appearing in Section 5 must also be maintained.

b. We are now printing individual sections of Supplement I and distributing them so that there may be several years elapsing between the distribution of Section 1 and that of Section 5, with the result that the user does not have available the "Comments on Principal Sources" for an unreasonable length of time.

c. The organization of Section 5 has been such as to treat the various classes of ports so that the contributor should not find it difficult to integrate this material within the respective sections, as is now done in all other cases.
